

# NERDYBOTS

---

## Setup Instructions

- Create folder where you want to store Warp Drive, and place the following directly in that folder:

maingui.exe  
images-1920-1080  
images-3840-2160

- Run the following setup files, and allow them to install with default settings:

tesseract-ocr-w64-setup-v5.3.0.20221214.exe  
AutoHotkey\_1.1.36.02\_setup.exe

- Choose the community\_patch\_settings file that matches your monitor resolution and delete the resolution from the filename so it looks like this:

community\_patch\_settings.toml

- Place the following files in the same folder as Prime.exe (the file that runs the STFC game)

community\_patch\_settings.toml  
version.dll

**\*\*If you already use Ripper's Mod (i.e. you already have these files in your game path), please ensure your ui\_scale and zoom settings match the provided toml file that matches your monitor resolution.**

- From your desktop, right-click anywhere on the desktop and select Display Settings

If your main display is 1920-1080 resolution, set the "Scale" to 100%  
If your main display is 3840-2160 resolution, set the "Scale" to 150%

**\*\* Note, if you prefer different settings for either Ripper's Mod or Display Scale, you can still use WarpDrive, but you will need to replace all images in the corresponding resolution images folder with images you capture on your own monitor with your preferred settings. This is quite time-consuming, so we recommend using the above settings to get you started quickly.**

- Start the Star Trek Fleet Command game, click on your avatar in the top left corner of the screen

Click Settings, Graphics Settings, Fullscreen  
Select Windowed  
Click Back  
Click General  
Turn On Extended Zoom  
Exit Settings

- Double-click on maingui.exe

Click Setup  
Go to [www.NerdyBots.com](https://www.NerdyBots.com) (log in if necessary), My Account, copy the Serial ID to your clipboard  
Paste Serial ID into appropriate field in Setup window  
Click the Browse button next to STFC Game Path  
Navigate to the folder where your game is stored and double-click on Prime.exe  
Click the Browse button next to Tesseract Path  
Navigate to the folder where the Tesseract program files are stored and click on tesseract.exe  
(usually in C:/Program Files/Tesseract-OCR)  
Click Submit

**Setup Complete!** Please watch our configuration tutorial video at <https://youtu.be/42bPjRF1RX4> to learn to create and launch ship plans!
